

IMS

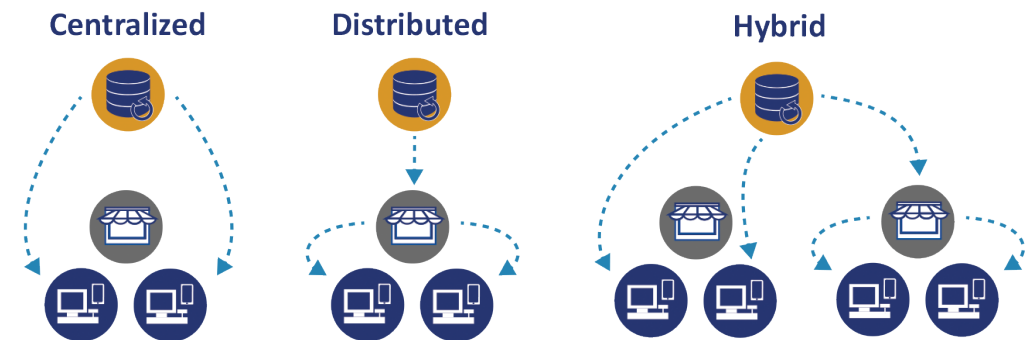

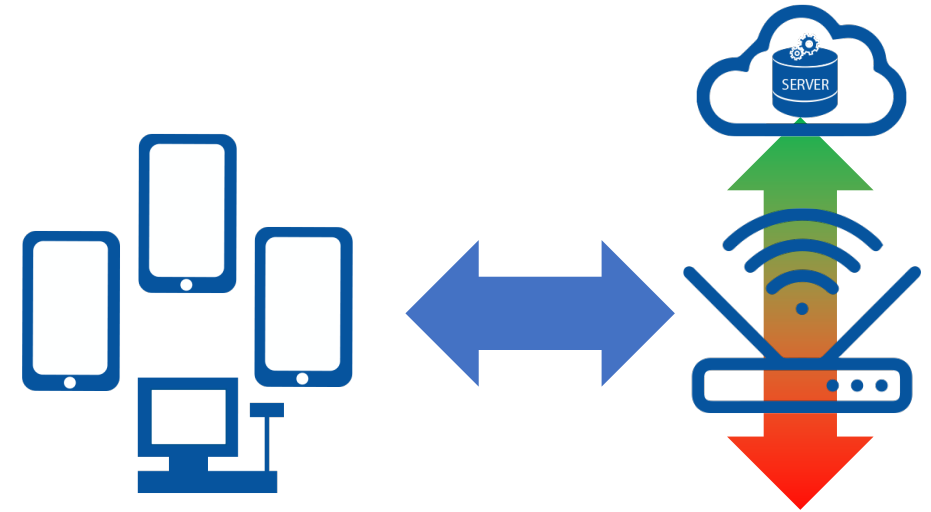

# PRISM Real-time Data

IMS Solutions for retail, stadiums, arenas, and venues

# PRISM Provides Real-time Data Without the Problems

Our strategy eliminates polling issues and is the best solution for inconsistent network accessibility.

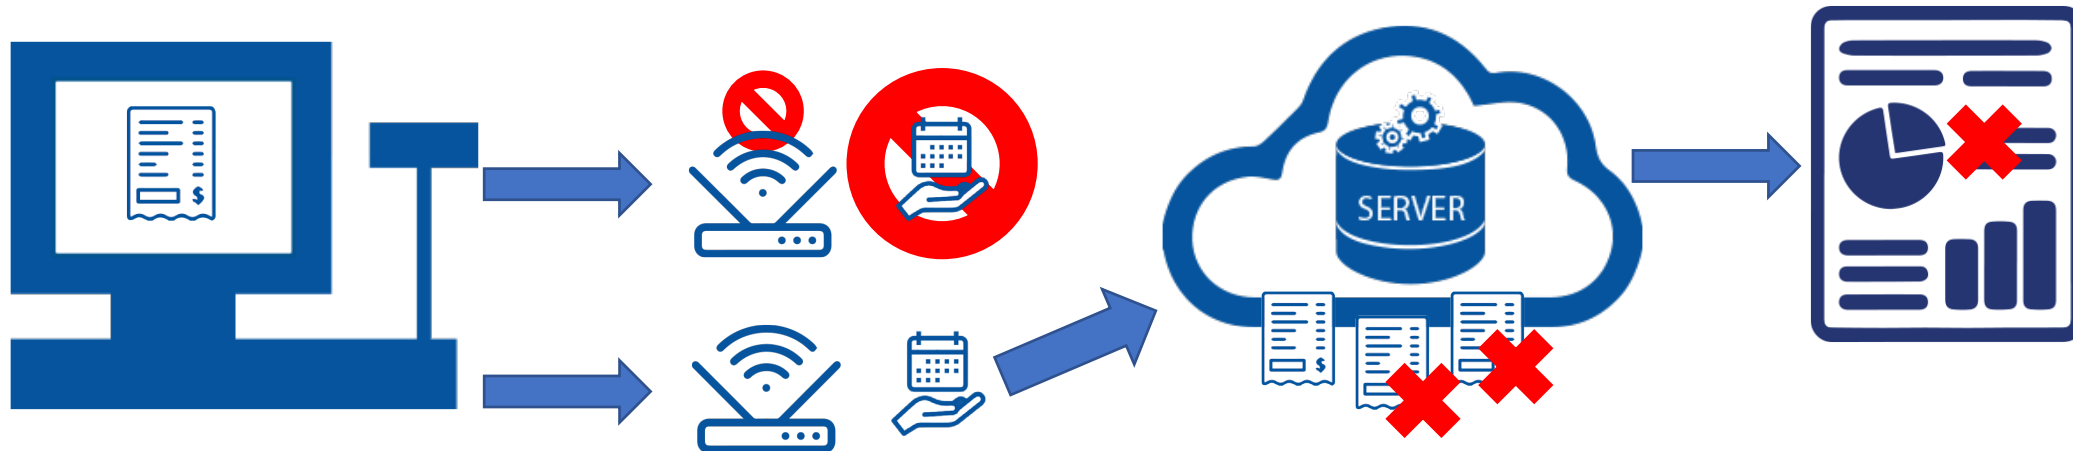

- Centralized, Distributed, and Hybrid architecture to meet all your needs
- Best-in-class software solutions
- Stable consistent access

# Typical Problem 1 - Non-SAAS

With a non-SAAS setup all local POS machines use a scheduler to send data at a particular time to a Main server.

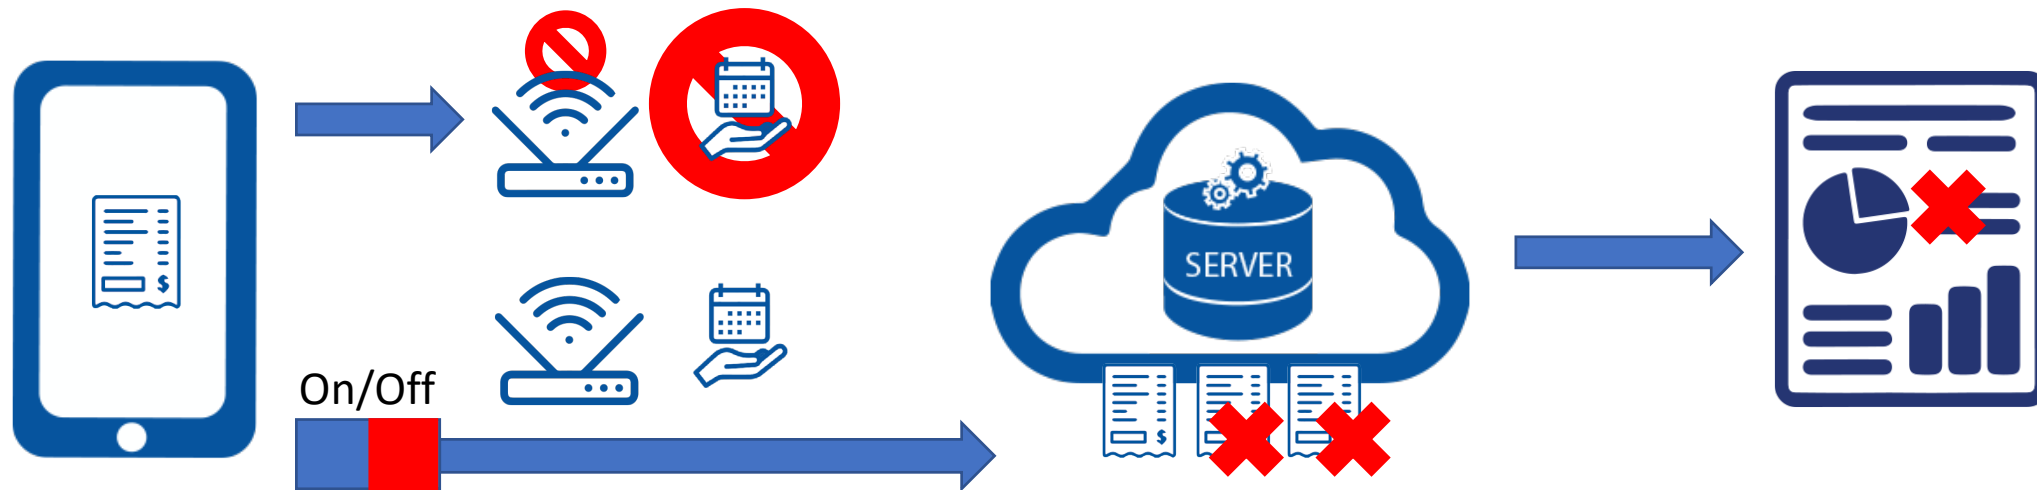

- **The problem** with this setup is that the scheduling software sometimes breaks
  - 🚫 POS stop sending data or try to send and fail
  - 🚫 This causes an interruption in data collection and inconsistencies

# Typical Problem 2 - SAAS

With a SAAS setup all local POS machines are dependent on the network to drive business.

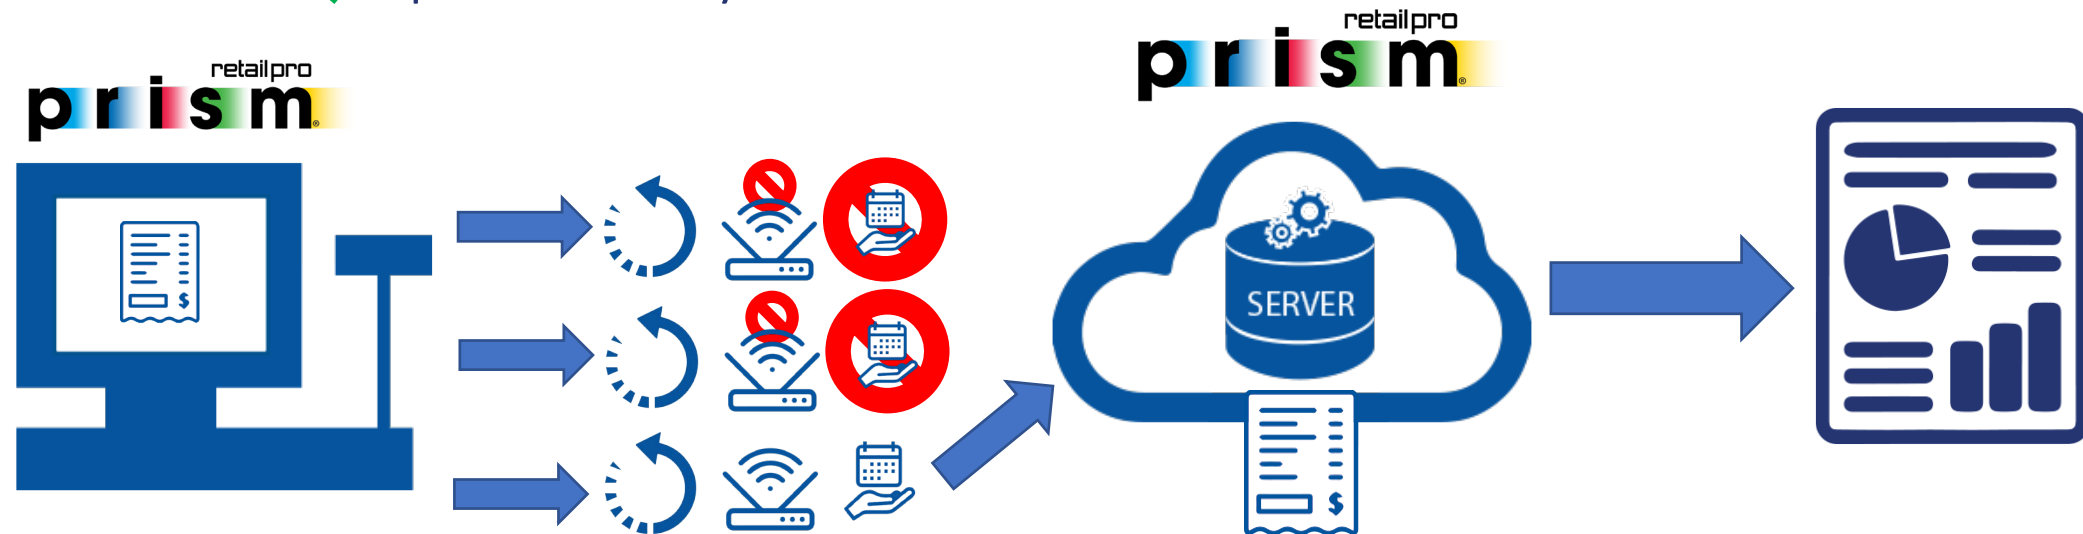

- **The problem** with this setup is that the connection sometimes breaks
  - ❌ POS can't find the wi-fi or network and either stop or fail to send (static)
  - ❌ Network inconsistencies due to old infrastructure or spikes in demand

# PRISM Provides the Most Stable Solution

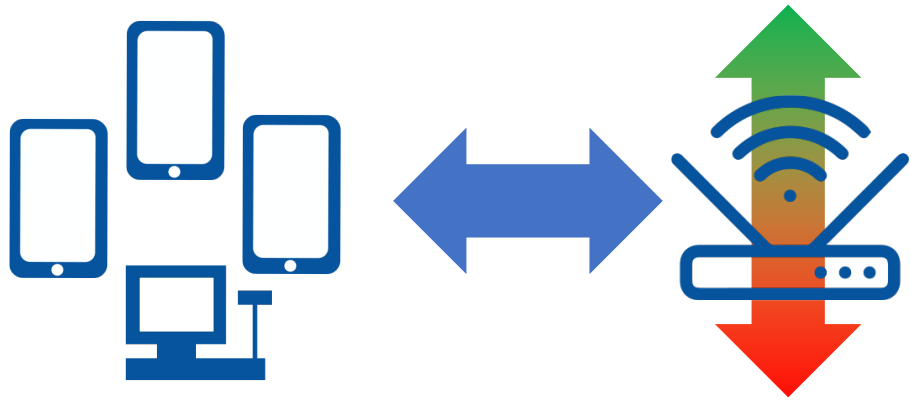

Write Local with a dynamic connection to a Network.

- **The solution**, whether you are using a Local or Cloud server is Retail Pro PRISM.
  - ✓ Every POS transaction is written **Locally** in real-time. If there is no connection, PRISM **dynamically** continues to connect until it succeeds.
  - ✓ No lost data, multiple redundancies
  - ✓ Speed + stability

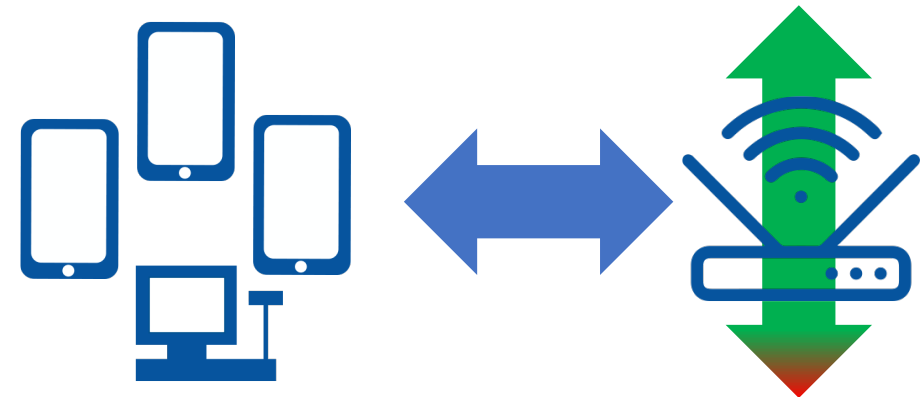

# PRISM Lowers Your Risk Profile

Redundancy and more stability

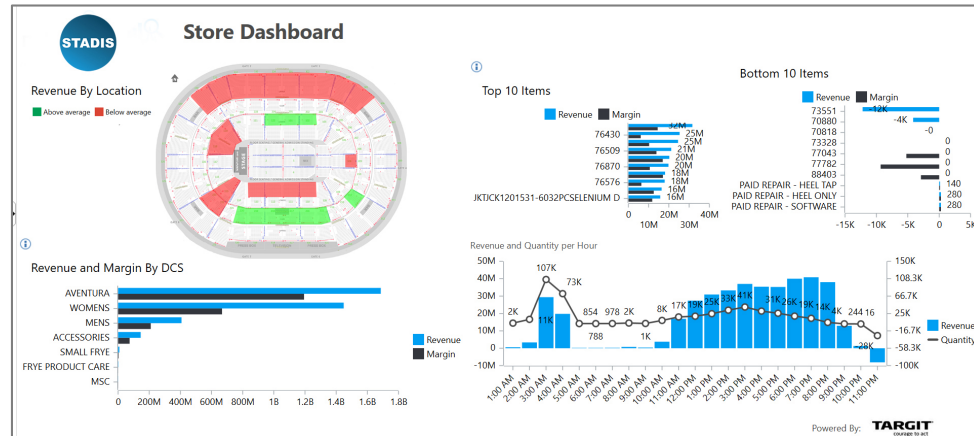

## Contributors to a High Risk Profile

- Older technologies
- Badly built network architecture
- Huge demands on the network

retailpro  
**prism**

# Real-time Accurate Data

Managers can take advantage of PRISM Real-time Data because:

- Data communication happens in real-time
- Information comes in a fluid manner

**Capture All Your Transactions without Polling!**

# Database Choice and Approach

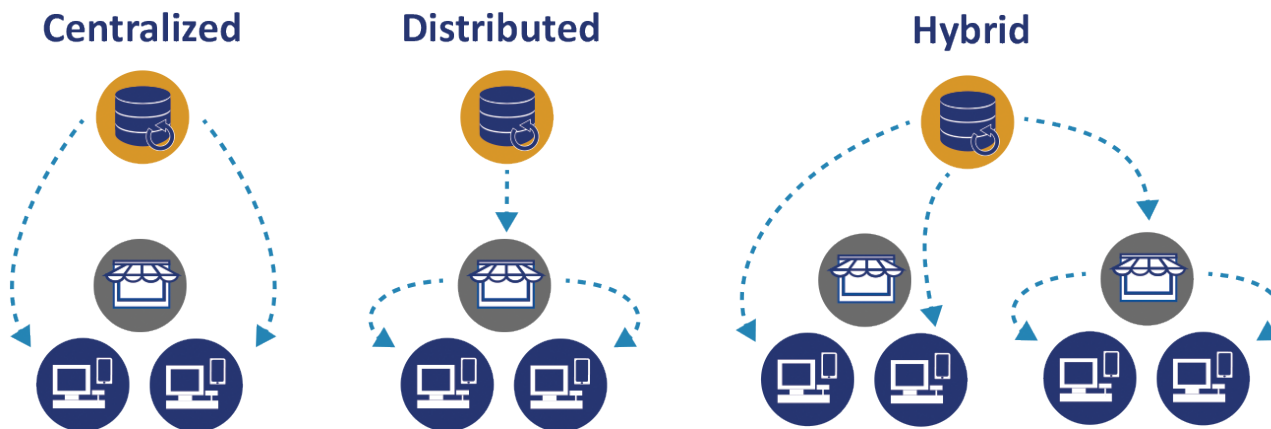

## Choose Your Database

- Oracle or MySQL
  - Flexibility of deployment choices
  - Power performance
  - Cost controls
  - Scalable

## Choose Your Deployment Approach

- Centralized
- Distributed
- Hybrid

Prism's flexible deployment options translate to faster performance, scalability, and allow for seamless integration with existing Retail Pro 9 and ERP platforms.

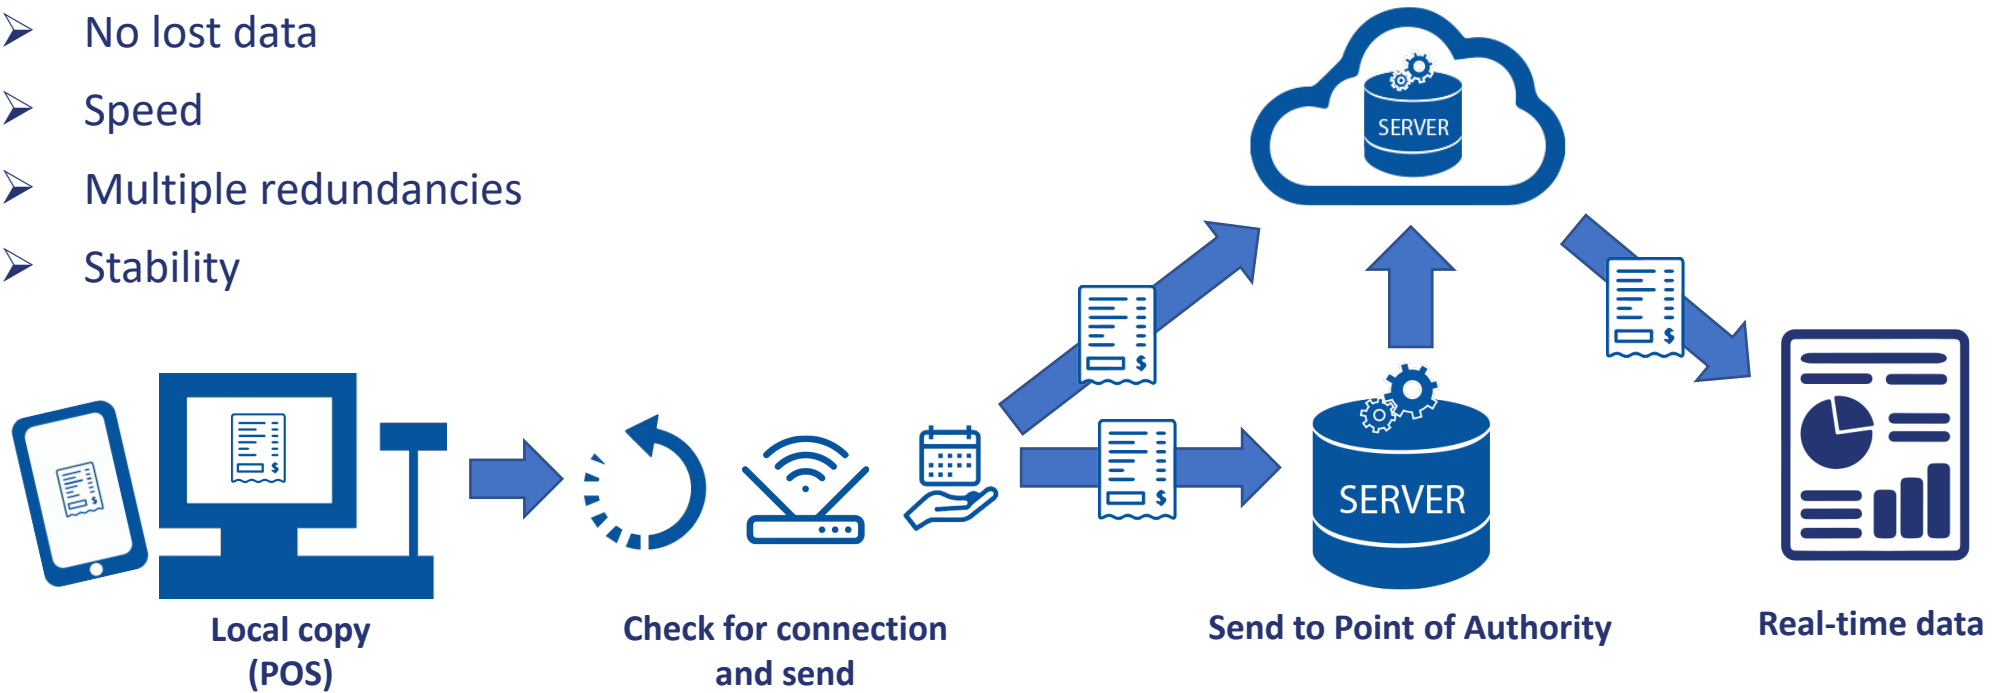

# IMS Solutions – PRISM Real-time Data

## To recap:

PRISM can either write Locally and then connect to either Local or Cloud server, or both. PRISM allows you the flexibility to accommodate all situations.

- No lost data
- Speed
- Multiple redundancies
- Stability
